

SUPPLIER FORUM

Wednesday, October 4, 2017 - 8:30 am – 5:00 pm

Renaissance Los Angeles Airport Hotel
9620 Airport Boulevard
Los Angeles, CA 90045 USA

Plan now to attend the AESQ Supplier Forum to learn more about key work streams led by the SAE G-22 Aerospace Engine Supplier Quality (AESQ) Technical Committee to standardize supplier requirements. Take advantage of this opportunity, as a key supply chain stakeholder, to provide your feedback to the AESQ leadership.

This event is hosted by the Aerospace Engine Supplier Quality Strategy Group and is supported by **SENIOR LEADERSHIP** from AESQ member companies including **GE Aviation, Pratt & Whitney, Rolls Royce, Honeywell, Safran, GKN, PCC, MTU and Arconic.**

GUEST SPEAKER

Dan Jacob
PRACTICE DIRECTOR AND PRINCIPAL ANALYST
LNS Research

OEM KEYNOTE SPEAKERS

James Clifton
VICE PRESIDENT OF
GLOBAL QUALITY &
CONTINUOUS
IMPROVEMENT
WG Forgings &
Structural Casting
Segment of PCC

John Calder
GLOBAL HEAD OF
SUPPLIER QUALITY
Rolls-Royce plc

Osa Omoruyi
DIRECTOR OF
AERO & IGT QUALITY
ENGRG AND PROCESS
MANAGEMENT
Arconic

Olivier Castets
SUPPLIER QUALITY
Safran

Martin Schaeffner
SR VP CORPORATE
QUALITY
MTU Aero Engine AG

Dele Awofala
SR. DIRECTOR,
SUPPLIER QUALITY
Pratt & Whitney
East Hartford, USA

BACKGROUND

Aerospace engine suppliers consistently voice concerns that quality requirements vary greatly between their customers, either flowed directly from engine manufacturers or through higher tier suppliers of engine manufacturers. Although these requirements have a common end goal, the different approaches drive significant inefficiency and risk as well as making it more difficult for a supplier to maintain compliance. Given this feedback, in 2012 a dialogue began between engine manufacturers to

gauge interest in developing a harmonized set of standards for the aerospace engine supply chain.

This dialogue led to the formation of the SAE G-22 Technical Committee aligned under SAE International and chartered with the development of common Aerospace Engine Supplier Quality standards and later to the creation of the AESQ Strategy Group under the SAE ITC. The AESQ has released four standards to date, five more are in the draft stages.

KEY AGENDA TOPICS

- Challenges within the Aerospace Engine Supply Chain
- AESQ Strategy & Vision
- AESQ Standards – Application in the Product Life Cycle & Quality Systems
- The Benefits of a Common Approach to Quality
- AESQ Marketplaces – 9 Workstreams Up Close
 - Solving Problems Effectively
 - Releasing Quality Product
 - Developing Robust Inspection Plans
 - Planning Robust Measurement Systems
 - Mitigating Process Risks
 - Managing Effective Internal Auditing
 - Controlling Process Variability
 - Managing the Supply Chain
 - Ways to Reduce External Auditing
- Future Collaboration in the Aerospace Engine Supply Chain

BENEFITS OF ATTENDING

- Be part of the development and discussion on key issues critical to aerospace
- Learn about new developments
- Customer Satisfaction and quantifiable gains
- Network with industry leaders and your peers and be part of the solution

WHO SHOULD ATTEND?

- Sr. Manufacturing Engineering Leaders
- Sr. Quality Management Leaders
- Sr. Operations Management

REGISTRATION

Attendance at this event is free and includes refreshments and lunch. A limited number of seats are available. Please register early at the following link:

If you are not available, please share this invitation with another person within your organization.
